

JERON WONG

SKILLS

Programming Languages(in order of experience): C++, Java, Android SDK, Python, HTML, CSS, JavaScript, PHP

EXPERIENCE

NWHacks: Bay Area Sponsorship Evangelist November 2014 - March 2015

- Worked on sponsorship team for NWHacks, the first hackathon at the University of British Columbia
- Contacted and negotiated with over a hundred companies and was able to successfully procure sponsors such as Apple, Oculus, and many more

FCSN: Youth Volunteer Coordinator September 2011 - May 2015

- Started volunteering at FCSN (Friends of Children with Special Needs) in 2011
- Promoted to youth volunteer coordinator for the South Bay Region in 2013
- Learned how to cultivate life skills for children with special needs, coordinate email communications for all volunteers and motivate interaction between volunteers and students

PROJECTS

CalHacks 2016: Tonefolio - Winner of "BlackRock API" Award

- Web app that predicts stock portfolio performance using artificial intelligence from IBM Watson Tone Analysis API and BlackRock Aladdin API
- First solo hackathon

YHack 2015: BasicSloth - Winner of "Nuance Innovative Use of Speech" Award

- Created a program that sent messages encrypted by GNU Privacy Guard through radio signals
- Used GNU Radio Companion, Python, Keybase.io, and Nuance API

Uncommon Hacks 2016: EmojiPasta.tech - Winner of Best .tech Domain

- Website that utilizes keywords in submitted text to match related emojis
- Built with Flask, NLTK, and Python hosted on a Digital Ocean Droplet

HSHacks II: Extra

- Android app that allowed users to post food listings and sell them to nearby users
- App idea is extremely similar to the app Traveling Spoon which was released several months after HSHacks II and received \$870,000 in funding

Hack the North 2015: Internet Karma

- Web app that took engagement data from Facebook, Twitter, GitHub, Instagram, and Reddit to provide total number of likes from across the social profiles
- Backend was built with Node.js/MongoDB, Android client built with Android SDK, and Pebble app built with Javascript
